

TAKE A CLOSER LOOK...
the numbers speak for themselves

hyco

**Series
70**

**Single Acting
Telescopic**

Piston length increased up to 40%. Combined with honed tube IDs — the result is greater stability, smoother operation, and increased cylinder rigidity.

Retaining glands made from nodular iron increase strength by 23%

Seals tested to a useful life of 7.5 years of normal use — without adjustments

Thicker critical sleeves (8" and greater) increase strength by 13%

DIN ST 52.3 alloy steel tubing increases impact resistance by 350% over conventional SAE 1026 tubing

Major Design Improvements

Major design improvements over other models make the Series 70 cylinder a problem-free product you will come to rely on. Take a closer look at the numbers and see how they can help you improve your bottom line.

Easy to Service

The Series 70 easy-to-service design is one more way Hyco raises the industry standard. Consider the benefits:

- No seal adjustments required.
- Positive-stop retaining glands eliminate guesswork. Just tighten glands until they bottom out on sleeve.
- A choice of two port locations is available to provide plumbing convenience.

Available in all Standard Sizes

“...the ideal equipment is installed, runs properly, and you can forget about it. The new Series 70 cylinder is that kind of equipment. I'd buy another one in a minute...”
